**REACT,NODEJS,EXPRESS**  
**MONGODB,GOOGLE CLOUD,AWS**

## Education

### ● Pragati Engineering College | B.Tech

May 2019-Present

Enrolled in this 4 years B.Tech program after achieving good marks in EAMCET, here I immersed myself into Computer Technology and gained a good efficiency in building and maintaining applications using various programming tools and techniques. Now I am gaining proficiency in CLOUD technologies with the support of my college and external resources.

Expected Graduation Date : May 2023 | Avg CGPA : 7.2

## Experience

### ● Freelancing

May 2020-Present

Since in the second year of my college , I started working as a Freelancer and developed more than 20 projects for clients and friends. My freelancing work mostly include in **REACT** App development using **NODE EXPRESS** as backend and SQL/NoSQL databases.

### ● REACT Developer | LiveStrong Technologies

August 2021 - February 2022

This 6 months part time working experience in one of the known software solutions providing company LiveStrong Technologies gives me a right perspective over the working culture and project management in software companies. I served as a **MERN** Stack application developer for LiveStrong and being involved in **designing, developing** and **maintaining** client applications. To focus further more on career and interest on cloud platforms makes me reject full time offer by this company.

# My Career Summary

- Since from the childhood I am more interested in **drawings, designs** and **building something with household wastages**. These activities increased my creative power in building something new.
- I was 12 years when I first exposed to Computer and I completely mesmerized by its abilities, of course mostly I used those for Gaming and creating designs using some pen tools but that's a great experience.
- With the interest on Computers I joined 4 year Computer Science program right after completing my High School studies with good grades, and this is where I came to know about my ability in building creative applications using various languages and tools, So I passionately started learning about software tools.
- Despite the college syllabus, I learned myself creating Web Applications using free online resources like **YouTube** and **Udemy**. I got a good hold on **JavaScript** and **React**.
- I started my **Freelancing** career to enhance my knowledge in building real world solutions for clients after done some personnel projects. In freelancing I helped some people setting up their own **Ecommerce Applications** and some peoples personnel **Portfolios** and even many more assignments.
- Since from the last one year myself I am being attracted by Cloud Platforms and their services, they are making application development so easy to develop and maintain. So I started learning how to use various services offered by **Google Cloud** and **AWS** with the help of some **externships** and **YouTube**.
- A part from these I am a voracious **Book Reader**, mostly my book stack filled with Personality Development and Mindset oriented books. I completed reading 7 books in the past 6 months.
